

ULTRA-LOCK CONNECTION SYSTEM

molex

The Brad Ultra-Lock system is comprised of a series of integrated distribution boxes and cordsets built on a patented “push-to-lock” technology that provides a simple and secure operator-independent connection.

Push-pull connectors providing a safe, reliable connection of sensors, actuators and other control devices. The operational benefits of the Ultra-Lock technology continue to grow over time, including up to an 80% reduction in electrical commissioning of industrial machinery and automation systems.

Improve your performance and reliability with the Brad Ultra-Lock Connection System

Performance

Ultra-Lock connectors incorporate a unique radial o-ring compression seal and mechanical locking design that deliver unsurpassed performance. A superior seal means fewer intermittent signals, less downtime for industrial operations and increased productivity for valued customers.

Reliability

The IP67/68/69K rated Brad Ultra-Lock connectors are designed to remain securely mated under the stresses of machine vibration, cable pulls and in-plant traffic of worker and mobile vehicles. The positive-locking design with built-in reliability eliminates the need to turn a coupler and connector-related intermittent signals due to harsh conditions or installer error resulting in a loose connection.

Saves Time and Money

Ultra-Lock technology is designed to eliminate connector-related production downtime and associated costs. The ability to change machine configurations quickly, without the need to hire a licensed electrician, can yield up to a 50% reduction in total installed cost.

Ultra-Lock

Connection System

Fast – Simple – Secure

Fast

Simply push down to connect and pull up to disconnect. Ultra-Lock Connectors form a secure seal simply by aligning and pushing.

Simple

There's no twisting or turning with Ultra-Lock connectors. That's a big advantage when working in tight spaces or with blind-mate applications. The simplicity and ergonomic design also mean operator fatigue is significantly reduced.

Secure

Ultra-Lock connectors are mated with the same, simple, downward pressure every time an installation is made because of the unique O-ring seal. This operator-independent, radial seal maintains an IP 67/68/69K watertight connection.

**Simply
push down
to lock!**

Sensors with Ultra-Lock technology will also work with standard threaded connectors.

Easy To Implement

The Ultra-Lock Connection System is backward-compatible with existing M12 connectivity systems. Ultra-Lock distribution boxes and receptacles will accept:

- Ultra-Lock connectors
- M12 threaded connectors
- MX-PTL M12 with push-to-lock coupling

Ultra-Lock

Connection System

Markets and Applications

Commercial Vehicle

Telematics

Industrial Automation

Automation Controls

Automation Equipment

Food and Beverage Processing

Material Handling Equipment

Petrochemical Complexes

Telecommunications

Base Stations

Universal, industry-standard M12 interface

Allows customers to easily change between Ultra-Lock and traditional threaded connection styles as needed

IP67/IP69K Protection

Radial O-ring provides proven protection against water ingress and dust

Operator-independent connection

Patented push-to-lock technology enables simple and fast connections that cannot be either too tight or too loose

Welding Devices

Features and Benefits

Push-to-lock technology	Simple and fast operator-independent connection
360° Positive-Locking-System	Reliable and secure connection
360° Radial Sealing	Superior protection against water-ingrees rated to IP67/68/69K
Receptacles accept Ultra-Lock or standard M12 threaded cordsets	Provides customer with option to use either format
Rated to 250V, up to 4,0A	Ideal for power and network circuit applications
Full portfolio available	Can fully substitute M12
Pre-wired MPIS distribution boxes with Ultra-Lock connections molded in PBT plastic or stainless steel housings	Saves wiring time and prevents mis-wiring for applications with a high-density of input or output connections

Ultra-Lock Radial Seal
Operator-Independent, reliable, watertight and constant-pressure seal.

Traditional Threaded Connectors

Under-Tightening
Axial Compression Seal is incomplete allowing moisture to penetrate and create shorts.

Over-Tightening
Axial Compression Seal can become damaged so moisture can enter.

Brad M12 Ultra-Lock

Distribution Boxes

Ultra-Lock Distribution Boxes are offered with 4, 6 or 8 ports, with single- or dual-input/output (I/O) per port. They are available in a variety of formats for backward compatibility with different connector styles. We also offer cabled, two-connector styles for the “Home Run” connection or field attachable MPIS.

- Accepts Ultra-Lock and threaded M12 cordsets
- For connecting actuators and sensors

Brad M12 Ultra-Lock

Cordsets

Ultra-Lock single-keyway M12 cordsets are available with many cable types and manufactured to optimize performance for your application. Ultra-Lock cordsets are offered in single- or double-ended configurations.

- PVC – for most standard applications
- PUR – for oil and coolant environments
- WSOR – for welding areas and oil resistance requirements

Brad M12 Ultra-Lock

Receptacles

Ultra-Lock receptacles give you greater flexibility because they are designed to accept both Ultra-Lock and standard M12 threaded cordsets.

Ultra-Lock receptacles are available in the following formats:

- Multiple M16 and PG9 mounting configurations.
- Front or rear panel mounting.
- With wire leads or PCB mount contacts.

Brad M12 Ultra-Lock

Field-Attachable Connectors

The performance and reliability of the Ultra-Lock connection system have been combined with the flexibility of the attachable connector. A user can take the male or female single-ended cordset, dress it out on the machine to the exact length required and then finish it off with an Ultra-Lock attachable connector. Attachable connectors are available in straight and right-angle designs. Both are available as either male or female connectors.

Brad M12 Ultra-Lock

In-Line Splitters

molex

Ultra-Lock In-Line Splitters allow you to service two devices through just one connection to the Ultra-Lock dual-I/O distribution box. Splitters are available with straight or right-angle connectors on the device ends.

In-Line Splitters are offered with Ultra-Lock connectors on all ends or with threaded connectors on the device ends. This gives you immediate use of the Ultra-Lock connector on the distribution box so you can connect to existing threaded sensors or other devices.

Ultra-Lock Splitters are available with three different application-specific cables:

- PVC – for most standard applications
- PUR – for oil and coolant environments
- WSOR – for welding areas and oil resistance requirements

Brad M12 Ultra-Lock

Bulkhead

molex

The Bulkhead Connector offers the convenience of quick-disconnect on both sides of a fixed wall, panel, or bulkhead. Virtually any time the path of flexible cords and cables comes to a wall, bulkhead connectors provide a professional path through the fixed surface. Their moisture seal gasket makes them ideal for bringing the cable into an enclosure located in a harsh environment.

Flamar Cable Solutions for industrial automation applications

Selecting the right cable for your application is very important to ensure a reliable and problem-free installation. Careful consideration of mechanical abrasion, fluid/chemical exposure, flexibility (C-track, torsion), temperature resistance and flame retardancy requirements is required to select the cable that will provide performance and reliability in service.

Flamar from Molex

Flamar, a Molex company since 2014, proposes a brand new set of cables designed to cover the broadest range of applications for machine builders and system integrators:

- **Signal & Control:** to connect sensors, actuators, valves and distribution boxes
- **Servo Motor:** for power and encoder/resolver connection
- **Network:** for I/O modules and connection to PLC
- **Hybrid:** composite multicore cables whenever extremely compact solution is required

Jacket choice for most demanding industrial application

- **PVC:** The most cost-effective solution for flexible and static installation.
- **WSOR:** Weld-Slag and Oil-Resistant Cable, a single-cable solution designed to withstand the severe environments found in automotive and industrial factory floors. Suitable for drag chain applications.
- **PUR (Polyurethane):** Ensures top mechanical performance, withstands harsh environments, abrasion resistant. PUR Jacket are halogen free. Suitable for drag chain applications
- **TPE:** Cables defined according to the US/Canadian market requirements (UL «PLTC»). Suitable for drag chain application.

3 Packaging Sizes

Each application section of the Designer Guide includes the ordering number in Small, Medium and Large cable spool corresponding to the cable code from the Brad cordset engineering numbers. More cable choice on www.molex.com/link/flamar

Small	Medium	Large

Weld-Slag and Oil-Resistant (WSOR) – the single-cable solution

Extended characteristics and resistance

- **Withstands severe conditions in harsh environments:** Weld-slag and oil-resistant outer jacket cable. Meets UL 758/1581 and VDE 472-803/B specifications for harsh environment applications. Hydrolysis resistant (EN50396); UV resistant (UL1581-300h); tear resistant (EN50396)
- **Multiple design options in drag-chain applications:** Highly flexible cables with bend radius specifications of 5x outside diameter for static and 7.5x outside diameter for dynamic and drag chain conditions
- **Wide temperature ranges:** static -40 to +90°C, dynamic -25 to +80°C and drag-chain -5 to +60°C
- **Ensures safety for out-of-the-cabinet use:** Certified flame retardant according to IEC 60332-1, CSA FT1, UL Vertical Flame Test UL21215, UL AWM Style 21215 / CSA
- **ECOLAB compatible** (resistant to detergents, disinfectants and wash down water-jet used in Food & Beverage).

One solution for various applications

- **Available in a large cross-section offering:** 0.25, 0.34, 0.50, 0.75, 1.00, 1.50 and 2,50mm² for use in a variety of applications, from sensors and valves to servo motors and networks.
- **Suitable to a variety of industry-standard connectors:** available over molded with M8, M12, Mini-Change (7/8"), M23 standard connectors for quick and reliable installation in the field or to be combined with Molex Field attachable connectors for increased flexibility.
- **Designed for use in multiple markets:** in the automotive and robotic area, from welding to cutting-oil environments, conveying and most machine applications.

Optimized and cost effective connectivity solution

As manufacturer of this cable range, Molex can control quality and cost at every steps of the cordsets production to provide price effective cordsets. Choosing this polyvalent WSOR cable helps also to reduce inventory costs. The WSOR cable can also be purchased raw by Molex for the termination on site.
